Expand strategic collaboration to accelerate AT&T's IT network application, shared systems modernization and movement to the cloud

Dallas, New Delhi - September 5, 2019: Tech Mahindra Ltd. a leading provider of digital transformation, consulting and business reengineering services and solutions, today announced expansion of its strategic collaboration with AT&T to accelerate AT&T's IT network application, shared systems modernization and movement to the cloud. Tech Mahindra will assume management of many of the applications which support AT&T's network and shared systems.

The multi-year agreement will enable AT&T to focus on core objectives, including having the most advanced software defined 5G network, and migrate the majority of its non-network workloads to the public cloud by 2024. This comprehensive program will help drive sustainable operational improvement across the network and software development domains.

Jon Summers, CIO, AT&T Communications, *said, "Our agreement with Tech Mahindra is another step forward in delivering greater flexibility across our IT operations. This includes optimizing our core operations and modernizing our internal network applications to accelerate innovation as we march forward to our goal of a nationwide 5G network by the first half of 2020. Our collaboration with Tech Mahindra will ultimately help accelerate our network operations and overall technology leadership."*

Together, AT&T and Tech Mahindra aim to improve the agility in rolling out and supporting networks of the future, while improving returns on investment through technology-led transformation. AT&T and Tech Mahindra will integrate several world class technologies and platforms in areas like artificial intelligence, DevOps, data analytics and 5G.

CP Gurnani, MD & CEO, Tech Mahindra*, said, "This is a step towards elevating Tech Mahindra's long standing strategic relationship with AT&T to help make the vision of a 5G-enabled future, a reality. As part of our TechMNxt charter, Tech Mahindra is betting big on 5G – network of the future, and is focused on technology-led innovation to enable digital transformation for our customers globally."*

The transformation roadmap also aims to optimize AT&T's IT application footprint by aggregating functionalities, while optimizing business processes, costs, efficiencies and overall quality.

***Manish Vyas, President, Communications, Media and Entertainment Business and the CEO, Network, Tech Mahindra**, said, "Our aim is to significantly boost AT&T's 5G time-to-market and simultaneously reduce their cost of ownership by automating aspects of their network lifecycle. We look forward to a continued strategic relationship with AT&T to drive innovation in technology and network ecosystem while delivering value and quality to our customers."*

As a part of its TechMNxt charter, Tech Mahindra is focused on leveraging next gen technologies to cater to the customer's evolving and dynamic needs. As a leading global digital transformation company, Tech Mahindra continues to deliver tangible business value and experiences to solve real business problems.
