Mahindra Powerol showcasing CEV-BSV Engines & Mobile Lighting Tower

Author : mahindraadmin Category : Published : 12/18/2024

Mahindra Powerol, part of the Mahindra Group, is exhibiting its products at BAUMA CONEXPO 2024, demonstrating its commitment to innovation and reliability. The launch of the new CEV BS5 Engines and Mobile Lighting Tower is expected to establish new standards in their respective sectors, showcasing advanced features and compliance with the latest industry regulations. The Mahindra Powerol booth at the India Expo Centre, Greater Noida presents the full range of BSV engines, which includes models offering 24.8 HP, 48.5 HP, and 74.8 HP, as well as a Mobile Lighting Tower tailored for the construction industry.

Highlighted product specifics:

? Introduced 24.8 HP 3-cylinder CEV BS5 Engine with best-in-class torque, making it ideal for Mini Compactor, SLCM, Mini excavator, Skid Steer Loader & many more.

? 48.5 HP CEV BS5 Engine for construction Equipment and Material handling Applications offering high gradability even in the toughest Inclines.

? 74 hp engine Build to withstand long working hours in most demanding situations from high altitude locations to sub-zero

temperature zones, with Best-in-class cold start ability.

? The Mobile Lighting Towers are portable units equipped with high-intensity electric lights and masts, accompanied by a trailer that includes a generator system to illuminate areas where there is insufficient natural or artificial light. These light towers find applications in construction, infrastructure development, the oil and gas sector, mining, military and defence, as well as in emergency and disaster relief efforts.
