Pune – June 3 rd , 2025: Tech Mahindra (NSE: TECHM), a leading global provider of technology consulting and digital solutions to enterprises across industries, announced a multi-year partnership with Hanab to modernize their IT infrastructure. The partnership aims to streamline operations and implement next-generation technologies to support Hanab's growth aspirations.

This partnership comes at a critical juncture for Hanab as the organization establishes its operational independence post its recent acquisition by Triton Partners, one of Europe's leading Private Equity firms. Hanab will leverage Tech Mahindra's extensive expertise in digital IT transformation and IT-carve outs to create a secure, scalable, and future-ready IT infrastructure. The initiatives will include deployment of an IT Service Management (ITSM) platform to enable IT infrastructure separation from the parent company. Additionally, it will support cloud automation and IT modernization programs

designed to manage and evolve their digital capabilities independently.

Mukul Dhyani, Senior Vice President, Business Head – Continental Europe, Tech Mahindra, said, *"Enterprises often face unique challenges like navigating complex legacy systems integration and managing constrained budgets while ensuring swift and seamless IT transitions. Our experience in managing complex carve-outs, coupled with proven frameworks for rapid IT modernization, will ensure that Hanab can accelerate its go-to-market strategies, optimize its processes, and enhance its customer offerings."*

The partnership reinforces Tech Mahindra's commitment to strengthening its presence in the Netherlands, a hub for advanced manufacturing and digital innovation. Building on its success with Dutch enterprises, Tech Mahindra will support Hanab in realizing the carve out from its previous owner. The partnership will implement services in a phased manner to uphold the highest standards of data integrity and privacy.

Eddy Spolspoel, CFO, Hanab, said, *"Partnering with Tech Mahindra ensures that we will be able to migrate successfully and get well-positioned to achieve our strategic objectives and build a robust IT foundation that supports our long-term vision. This partnership is a pivotal step in enabling us to deliver greater value to our stakeholders, improve operational agility, and strengthen our market competitiveness."*

The partnership underscores both organizations' commitment to innovation and excellence. Tech Mahindra has collaborated with leading manufacturing

and industrial companies for over two decades to deliver large-scale transformation programs, leveraging automation, IoT, and AI-driven solutions. With over 300 successful engagements across Europe, including pilots in the Netherlands, Tech Mahindra will leverage its domain expertise to help Hanab drive innovation and streamline processes.

About Hanab

Hanab is a leading multi-utility service provider with a focus on infrastructure solutions in the fields of energy & utility, connectivity and building installation primarily in The Netherlands. The company operates via three segments: 1) end-to-end construction and maintenance services in energy and utility infrastructure including high-, medium- and low-voltage electricity, gas and water networks and is strongly exposed to energy transition tailwinds. 2) Full-service connectivity installation services provider, covering the design, realization and maintenance of fiber networks and B2B network solutions for telco and private customers. 3) Comprehensive building installation services including design, installation and maintenance of, among others, electrotechnical installations, heating ventilation, and air conditioning. The Company has a proven track record of delivering high-quality services resulting in long-standing relations with a diversified, blue-chip customer base.
