Aims to create a positive impact based on water and power management systems such as drip and sprinkler irrigation and other AgTech solutions Part of the Mahindra Group's commitment to create a positive impact on society and the environment

Mumbai, June 05, 2025: Mahindra EPC Irrigation Limited, a pioneer in micro irrigation in India, has enabled savings of an estimated 262 crore litres of water and 8.4 MU (million units) of energy in FY'25. With a commitment to land restoration and drought resilience, Mahindra EPC achieved this feat through its ***customized micro irrigation systems, community irrigation and agricultural water management projects.***

This achievement is an outcome of Mahindra EPC's broader effort to ***"Do More with Less" and "Rejuvenating Nature".*** This is a key pillar of Mahindra Group's Sustainability Mandate and aims to safeguard natural

resources and play a meaningful role in climate action.

Commenting on the achievement, Ramesh Ramachandran, Managing Director – Mahindra EPC Irrigation Ltd., *"Putting farmers first, at Mahindra EPC we aim to drive widespread adoption of micro irrigation. With this milestone we not only enabled significant water savings, but also energy savings, all while continuing to make Indian farming more resilient. Underlining our dedication to environmental stewardship and farmer prosperity, this milestone aligns with the government's goal of* ***'Per Drop, More Crop'****, as well as that of the Mahindra Group's Sustainability Roadmap."*

Mahindra EPC's innovation in irrigation technologies is part of a broader initiative to address critical issues such as land degradation and drought. By providing farmers with the necessary tools and knowledge for effective water management, Mahindra EPC plays a vital role in boosting agricultural productivity while preserving essential natural resources.

The company provides customized end-to-end water management solutions to individual farmers and communities and supports farmers with modern scientific solutions, through automation, alternative techniques and community related initiatives.

To deliver on various solutions Mahindra EPC has a strong network of over 1,000 channel partners which is supported by its branch offices spread across India. The company is also known for its quality services related to planning, design, installation and agronomy, and it also enables delivery of

these services to farmers digitally.
