Mahindra Launches YUVO TECH+ 475 DI with High Cubic Capacity mBULL engine

Farm

Author : mahindraadmin Category : Farm Published : 9/22/2025

- *Powered by Mahindra's 2980 cc **mBULL 3-cylinder engine** with water separator for extended engine life*
- *Impressive **191 Nm of max torque and 28% backup torque** for a wide range of implements*
- ***Available in 2WD and 4WD** delivering **42 HP** for superior performance across diverse farming and non-farming operations*

Mumbai, September 22, 2025: Mahindra Tractors, India's No.1 tractor brand has introduced the all-new Mahindra YUVO TECH+ 475 DI, a 42 HP tractor specially built to provide farmers with unmatched performance, modern technology, and power to take on farming and non-farming tasks with ease. Designed for higher productivity, improved fuel efficiency, and comfort, the Mahindra YUVO TECH+ 475 DI is a dependable partner for farmers across the country.

At the heart of the **YUVO TECH**+ 475 DI is a powerful **2980 cc mBULL 3-cylinder engine that produces 191 Nm of maximum torque and an impressive 28% backup torque. A water separator** increases engine life by preventing water and contaminants from damaging critical engine components. By removing water from the fuel, a water separator reduces the risk of corrosion, rust, and clogging in the fuel system, leading to improved engine performance and a longer engine life.

The Multi-Speed PTO (MSPTO) gives farmers the **flexibility to adjust the PTO** speed according to specific tasks, whether it is running a rotavator, powering a bailer, or operating other equipment. This flexibility not only enables quicker turnaround time, but also saves fuel, while reducing the overall cost of operations.

Dual clutch technology, 12 forward and 3 reverse gears enables the tractor to maintain operational speeds even while operating in tough soil conditions or pulling heavy loads. The new tractors heavy- duty hydraulics, with a **lift capacity of 2000 kg** and a **29 lpm hydraulic pump (litres per minute)** flow ensures that the Mahindra YUVO TECH+ 475 DI can handle big and heavy implements with ease.

Mahindra has also focused on operator comfort while designing the YUVO TECH+ 475 DI, with an **ergonomically designed** spacious seating area, a **power steering system** and **easy-to-reach controls** reducing operator fatigue during long working hours.

To ensure peace of mind, Mahindra is offering an industry **best 6-year warranty** on the YUVO TECH+ 475 DI. The long-term warranty reflects Mahindra's confidence in the durability of the tractor and the company's commitment to supporting farmers in accomplishing more with high power, multi-application versatility and modern technology.

The tractor is available at Mahindra Tractor dealerships across Andhra Pradesh, Telangana, Tamil Nadu, Karnataka and Maharashtra.

About Mahindra Tractors

Mahindra Tractors is India's No.1 tractor brand and has been the country's largest tractor manufacturer by volume for nearly four decades, with Mahindra having rolled out its first tractor in 1963 through a joint venture with International Harvester Inc., USA. Built 'Tough', Mahindra Tractors are known for their exceptional build quality and performance on rugged, unforgiving terrains. This reputation has earned the Mahindra Tractor brand prestigious global recognition, including the Deming Award and the Japanese Quality Medal—making it the only tractor manufacturer to receive both honors.

In March 2024, Mahindra Tractors became the first Indian tractor company to sell 4 million tractors globally, with a presence in over 50 countries across six continents. Powerful, fuel-efficient, and designed for longer duty cycles Mahindra Tractors offers the widest portfolio of over 300 tractor models, developed through world-class product development, R&D, testing, and

manufacturing standards.

Proudly made in India, Mahindra Tractors are manufactured across five locations in the country, while also maintaining a strong global manufacturing and assembly footprint through subsidiaries and joint ventures in North America, Brazil, Finland, Turkey, and Japan. The U.S. is the second-largest market for Mahindra Tractors after India.

The Mahindra Tractors range is supported by India's most comprehensive network for sales, service, and spares—ensuring the lowest total cost of ownership and the highest resale value in the industry. In addition to tractors, Mahindra also has a significant presence in farm machinery, offering a comprehensive range of self-propelled and tractor-driven machinery that provides solutions across the entire agri-machinery value chain.
