Pune – June 23rd, 2026: Tech Mahindra (NSE: TECHM), a leading global provider of technology consulting and digital solutions to enterprises across industries, announced the expansion of its partnership with Telefónica Germany to build a next-generation private cloud platform to accelerate cloud-native transformation and to provide Platform-as-a-Service (Paas) for technology and enterprise business growth. The multi-year engagement will focus on enabling a scalable, open, and future-ready digital infrastructure foundation to modernize telecom and enterprise workloads.

The partnership will combine Tech Mahindra's end-to-end platform engineering and AI-first operations with Telefónica Germany's telecom infrastructure modernization objectives to create PaaS, laying the foundations for a full scale private cloud. The platform will work as a scalable blueprint for open digital infrastructure transformation at enterprise level with building blocks of Compute, Storage, Backup, Containers, Graphics

Processing Units (GPU) and Ransomware Protection as a Service. The partnership will empower Telefónica Germany with a flexible cloud environment that supports cloud-native innovation, AI-led operations, and long-term infrastructure transformation. Additionally, Telefónica Germany will be able to accelerate infrastructure sovereignty, telco cloud advancements, reduce dependency on proprietary virtualization environments, and strengthen business-to-business (B2B) monetization capabilities through a unified strategic partnership model.

Harshul Asnani, President and Head - Europe Business, Tech Mahindra, said, *"Telcos are looking for open, scalable, and cloud-native infrastructure environments that support evolving digital service demands while optimizing operational efficiency. Our partnership with Telefónica Germany reflects a shared commitment to building a solution that combines Automation, flexibility, and resilience. By leveraging platform engineering, cloud-native technologies, and AI-driven automation, we are creating a strong foundation for next-generation telecom infrastructure and enabling enterprise and business-to-business (B2B) growth."*

Tech Mahindra will also leverage AI-driven automation, cloud-native orchestration, infrastructure-as-code frameworks, and self-service platform management capabilities to support the platform as a service. The platform is designed to enhance AI-first automation, operational flexibility and resilience while supporting both traditional and next-generation

infrastructure services for telecom and enterprise businesses across Germany.

Markus Ruwisch, Head of Infrastructure Platforms & Services, Telefónica Germany, said, *"This partnership supports our strategy to modernize infrastructure through a more open, flexible, and resilient Platform-as-a-Service architecture. Together with Tech Mahindra, we will establish a platform foundation capable of supporting future AI-native digital services, enterprise workloads, and evolving B2B requirements in Germany, while strengthening operational control, digital sovereignty, and long-term infrastructure resilience."*

The partnership further strengthens Tech Mahindra's position as a strategic transformation and platform engineering partner for telecom operators in Europe while expanding opportunities across managed services, cloud transformation, platform engineering, and telecom infrastructure modernization.

About Telefónica Germany

Telefónica Deutschland is a leading full-service provider of telecommunications services for residential and business customers. The portfolio of its core brand, O2, as well as various secondary and partner brands, includes not only traditional voice and internet services but also innovative digital services in the areas of the Internet of Things, security, entertainment, and data analytics. In mobile communications, Telefónica Deutschland serves approximately 35 million mobile connections (as of

March 31, 2026). The company is the leading mobile provider in the consumer market and in the market for innovative partner offerings, as well as a rapidly growing provider in the solutions business for corporate customers. The company's high-performance and multi-award-winning mobile network reaches more than 99 percent of the population. In the fixed-line sector, O_2 offers leading technological diversity and geographic coverage in Germany. In fiscal year 2025, the company generated revenue of 8.2 billion euros. The company is majority-owned by the Spanish telecommunications group Telefónica S.A., headquartered in Madrid, one of the world's largest telecommunications groups.
