

ENERGY MANAGEMENT POLICY

Automotive Sector

Mahindra & Mahindra Ltd. Automotive Sector is committed to follow responsible business practices & designs to enhance energy performance and continually reduce carbon footprint across all our locations.

To achieve this, we shall:

- Continually improve the organizations energy performance through implementation of Energy Management System.
- Setting Energy objectives, targets and review mechanism.
- Ensure the availability of necessary information and resources to achieve objectives and targets
- Comply with all applicable legal and other compliance obligations related to energy use, consumption and efficiency.
- Promote use of renewable energy and green initiatives to conserve natural resources
- Deliver on Carbon Price to embrace eco-friendly technologies & innovation in our business operations.
- Encourage capacity building across all locations to integrate energy management with all Operations, Equipment's, Systems and Processes.
- Purchase energy efficient products, equipment's and services as per Green Procurement Policy and Design for improving the Energy Performance throughout their life cycle.
- Encourage stakeholders, Associates and Supply Chain Partners for adopting energy management systems, techniques and technology as applicable.

The Energy Policy shall be reviewed periodically during management reviews.

It shall be communicated widely and interpreted at all levels, adopting participatory approach to inspire employees and Service Providers towards enhancement of Energy Productivity.
